MAR 2022

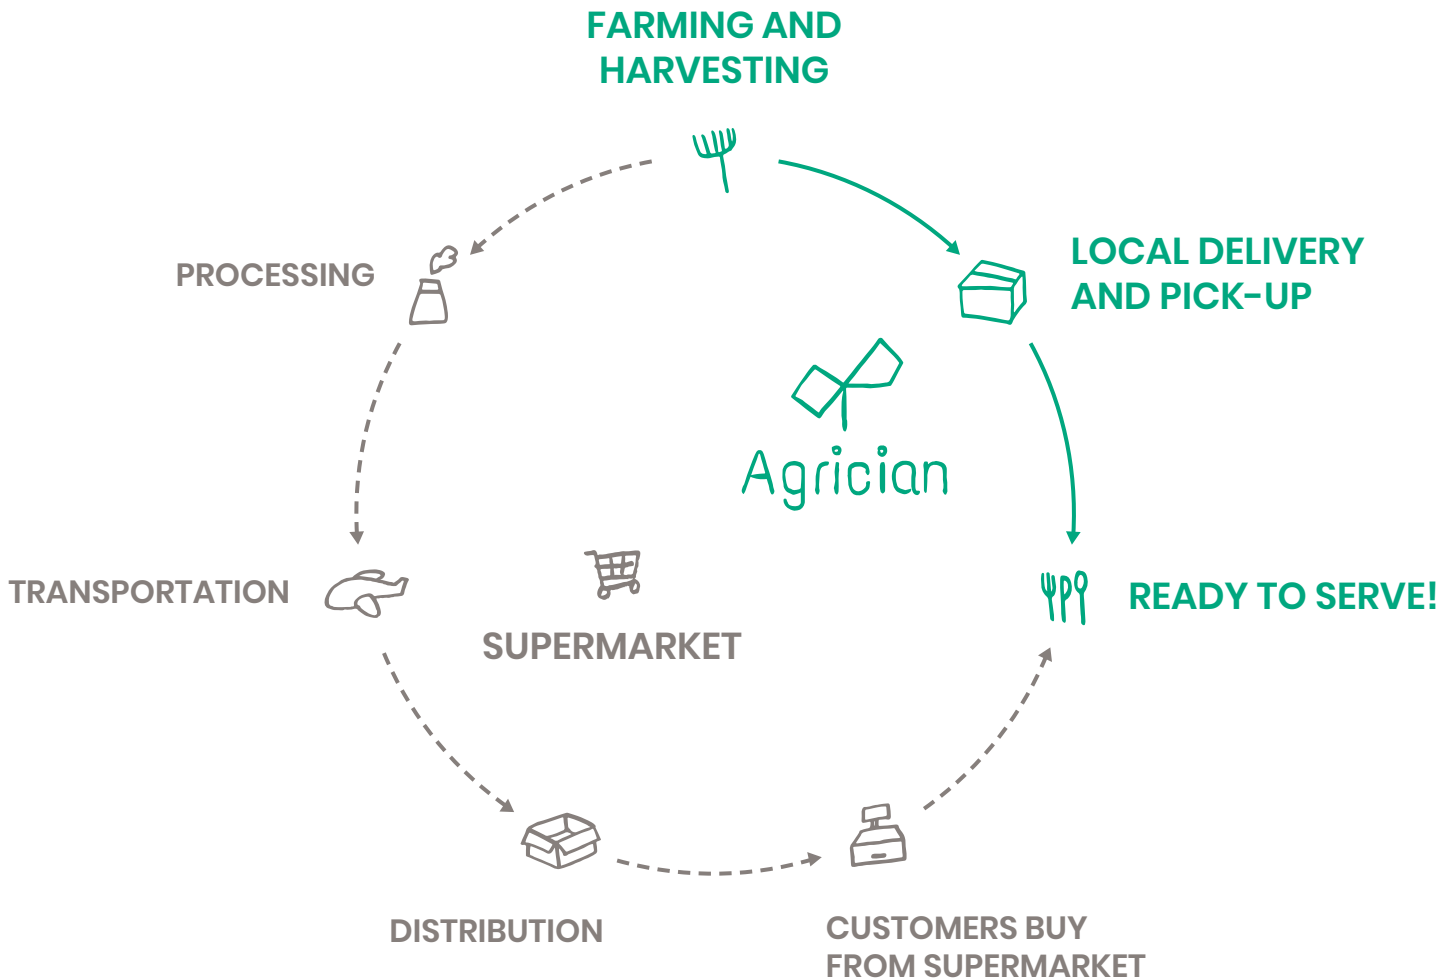

URBAN FARM NEXT TO YOUR DOOR.

We believe that the food system is a crucial aspect of our well-being and healthy planet.

In 2021, we see a huge opportunity for us to re-imagine, re-think and renovate our modern food system, especially in an urban area, where food always comes from thousands of miles away, urban farming could be a solution to shorten food miles and bond people together again.

Our concept farm is located in Fo Tan, Hong Kong. We renovated an abandoned space from an industrial building, formerly a bicycle warehouse and turned it into an urban farm.

HOW IT WORKS?

We minimize food miles = Fresher greens
+
Less carbon emission

Hyper-Fresh.
Premium Quality.
Pesticide-Free.

About Our Greens.

Swiss Chard

#rainbow #colourful

Curly Kale

#superfood
#greensmoothie

Red Russian
